

Manufacturing Means Jobs!

The President and Congress can save jobs by reining in the Environmental Protection Agency's (EPA) regulatory agenda. The EPA's unrealistic requirements on utilities, boilers and cement factories are costing jobs. The aggressive standards on greenhouse gas emissions and coal ash regulations are additional examples of EPA overreach.

America needs jobs, not burdensome and unrealistic government rules that strangle economic growth.

We urge Congress to pass H.R. 2401, the Transparency in Regulatory Analysis of Impacts on the Nation (TRAIN) Act. This will help Congress and the nation understand the cumulative economic cost of EPA regulations on manufacturers!

Signed by members of the NAM Council of Manufacturing Associations listed below.

Adhesive and Sealant Council
American Architectural Manufacturers Association
American Chemistry Council
American Composites Manufacturers Association
American Home Furnishings Alliance
American Iron and Steel Institute
