***Re: Manufacturers Urge You to Veto Senate Bill 998/CWIP and Regulatory Asset Bill; Utility Rate Increase Bill***

Dear Governor Stitt:

On behalf of the Oklahoma manufacturing sector, which accounts for 140,600 jobs and contributes \$21 billion in GDP, we respectfully request that you veto Senate Bill 998. It is an ill-conceived utility-backed bill that mandates construction work in progress (CWIP) cost recovery from utility ratepayers for new gas-fired generation and also authorizes regulatory asset treatment for capital investment projects without Corporation Commission oversight and review. Chairman Mark Christie of the Federal Energy Regulatory Commission is on record opposing CWIP.

Imagine buying a house and having to pay for it upfront and then not move in for 5 years while it is under construction. And the homeowner is not allowed to oversee the construction to ensure that the costs are just and reasonable. That is what CWIP does.

If enacted into law, SB 998 will result in an immediate increase in electricity rates for homeowners, farmers, and manufacturers who will not receive the benefits until the natural gas generation plant begins to operate.

SB 998 is anti-consumer and crony capitalism at its worst. We urge you to protect electricity utility customers by vetoing SB 998 rather than ensure enhanced profits for utility monopolies at the expense of captive electric utility customers.

Sincerely,

Paul N. Cicio
